

## Preparing for your roofing installation

Thank you for choosing McVay Brothers to improve your home. We have been helping Inland Northwest residents improve their homes since 1955.

Following are some ideas to help you prepare for your installation:

- We will be pounding on your roof, so please remove any valuable items from your interior walls that could fall from vibration.
- Please notify us of any current leaks or existing damage to your roof.
- Please notify us of any loose or extremely heavy light fixtures or ceiling fans. These may need to be removed prior to installation.
- We often utilize equipment such as our exclusive roofers' buggy to minimize the mess during tear-offs. However, roofing is a messy business and you should expect dust and dirt, especially if we are re-sheeting your roof.
- We normally work between the hours of 8:00 A.M. and 5:00 P.M. Please let us know if you work nights or have any special needs in this area. Do not be concerned if it is over 90 degrees and your crew leaves early for the day – it is extremely hot up there. During extreme heat waves, we may ask you if we can work in the evenings.
- In most cases, we will need access to power from the exterior of your home or structure.
- Please let us know if you have a preferred area for our product, equipment or vehicles.
- Our installers come and go, so please make sure your pets are secure during our installation.

Please do not hesitate to call our production staff at 509-928-4686 or 1-800-635-2829 if you have any questions.
