

Preparing for your siding installation

Thank you for choosing McVay Brothers to improve your home. We have been helping Inland Northwest residents improve their homes since 1955.

Following are some ideas to help you prepare for your installation:

- We will be pounding on your exterior walls so please remove any valuable items from your interior walls that could fall from vibration.
- Please remove any wood piles or large items that may prevent the completion of your installation.
- We normally work between the hours of 8:00 A.M. and 5:00 P.M. Please let us know if you work nights or have any special needs in this area.
- In most cases, we will need access to power from the exterior of your home or structure.
- Please let us know if you have a preferred area for our product, equipment or vehicles.
- We may be removing and reinstalling some exterior fixtures such as door bell ringers, lights, address numbers, etc. so if you would like to go out and purchase new exterior fixtures, we would be more than happy to install the new items for you. Just let us know!
- Our installers come and go, so please make sure your pets are secure during our installation.

Please do not hesitate to call our production staff at 509-928-4686 or 1-800-635-2829 if you have any questions.
